

# How It Works

## *Directions:*

1. Using all available resources, research and locate a current financial scheme, fraud or scam and gather as much information as possible.
2. News stories, examples and tips as well as consumer protection agencies which could be used to avoid this type of scam should be included. You may also include interviews with local victims or law enforcement personnel if available.
3. Once all information is gathered, create a presentation outlining how the scheme, fraud or scam works.
4. Create a citation sheet listing all sources used and be prepared to answer questions.
