

Developing a Hobby

Directions:

1. Choose a hobby in which you would like to learn more about.
2. Using the Internet, library or any other available resources, research and gather the following information:
 - What kind of equipment/supplies does it require (provide a list of basic items needed to get started)
 - What is the cost of the supplies/equipment needed (provide at least two prices for each item)
 - Where can you find a tutor or interest group to learn/practice
 - Photos of the hobby
 - Any other information your instructor deems necessary
3. Using the information, create a Microsoft® PowerPoint® presentation detailing your findings and answer the following:
 - Why are you interested this hobby
 - Since conducting additional research, would you consider participating in the hobby
 - If yes, where, in your current schedule, can you find time to practice
4. Remember to create a citation slide listing all sources used.
5. Share your findings with your classmates.
