

Money Management Tools

Directions:

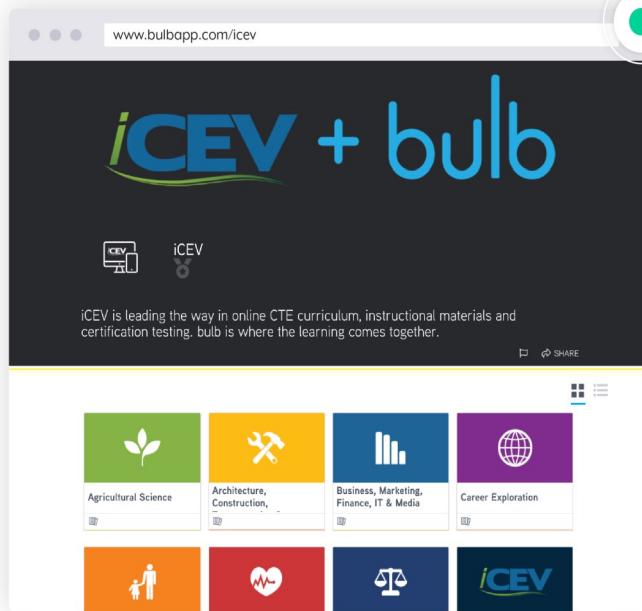

1. Using the Internet, identify four money management tools which can be used to help manage your finances. These tools can include different budgeting apps, investment tools, etc.
2. Develop a report which details the following for each tool:
 - Basic features
 - Why would you use the tool now and in the future
 - how can you see using the tool in each stage of the life cycle
 - Any costs associated with the tool
 - Advantages of the tool
 - Disadvantages of the tool
3. In the final portion of the report, include a short (at least 400 words) summary of money management which explains why it is important to monitor and control personal financial information in general and when using money management tools.

See the next page for instructions to access the available bulb template for this project.
