

CHAPTER 10 **Ethics in Accounting****Student Activity Sheet** *(textbook p. 274)*

Computer viruses "reproduce" themselves in computer programs, slowing the system or destroying data. A friend gives you a computer game with a harmless virus. To add some fun at work, you load the game onto the company's network.

1. What are the ethical issues?

2. What are the alternatives?

3. Who are the affected parties?

4. How do the alternatives affect the parties?

5. What would you do?
